

**Costs**

The costs for treatment with detailed medical history, examination and treatment with different osteopathic techniques are estimated between 69-99 euros.

The fees are charged to the scale of charges for medical practitioners (GebüH).

**Reimbursement by statutory health insurance**

The reimbursement is regulated differently by the statutory health insurance companies.

Since coming into force of the Medical Care Act 2012 (“Versorgungsstrukturgesetz”) many statutory health insurances reimburse the fees for osteopathic treatments proportionately.

Please ask for details at your health insurance company.

**Private health insurance or supplementary insurance**

The private health insurance companies generally reimburse the fees for the treatment.

In any case it is advisable to clarify the question of reimbursement with your company before starting the osteopathic treatment.
